

Report on RedHad Seminar

Red Hat training: DECODING THE FUTURE WITH OPEN SOURCE

The expert talk was conducted by, Mr. Nilesh J. Vaghela working with the leading company ELECTROMECH CORPORATION situated in Baroda and Ahmadabad on 31ST January, 2012 at Gardi Vidyapith.

The company provides open source Solution, Support, Training and Development since 1996, to all size organization starting from small to large corporate, with most experience and certified staff. The main motto is “*to provide solutions based on open source products*” to large Corporate, small enterprise and individual users, and let organization feel “*Be free and stable*”.

Mr. Vaghela add the following thoughts in his talk:

“Red Hat Certified Engineer (RHCE) is called the crown jewel of Linux Certification”

The Value of Red Hat Performance Based Certification:

Technicians and administrators need both technical experience and project management skills to play their role in the success of open source project. Project management skills too are best taught by reviewing case studies and using a realistic, project-based method.

Designed as rigorous and practical training and certification program, RHCT and RHCE certifications are demanding tests that cover the relevant skills that open source administrators need. The exams accurately reflect the individual’s ability to install, configure, and attach a new Red Hat Linux System to an existing production network.

Students while enjoying session of Mr. Nilesh J. Vaghela.
