

B H Gardi College of Engineering & Technology

A Report on Industrial visits to “LAVASA CITY”

Schedule: Date: 12th , 13th & 14th August, 2016

Time: Three Days

Place: LAVASA CITY, Pune, Maharashtra

Target Audience: 7th Semester Students, Civil Department

The tour was planned to LAVASA city developed on the Pune hill station completely self-reliant is the greatest model of the town planning in modern era of 21st century. The tour had been planned considering the comfort, safety and security of the students in a manner to deliver the best through an industrial visit. Lavasa is the Self-reliant city comprises of all basic amenities & entity of Ideal city is marvellous example of town planning constructed by HINDUSTAN CONSTRUCTION COMPANY. The guide explains that city was constructed on seven hills near Dasve dam which was completed in 2010 & Lavasa may go on to host one university. The student's learned that the city had its own water supply scheme, sewage treatment & hospitals, schools and university. The student's developed idea of modern construction method and trends and also develop the idea of different domain of civil disciplines & critical role of civil Engineering.
