

Gardi Vidyapith honoured with the prestigious 'Shiksha Bharti' Award

Gardi Vidyapith, an institute of Genius Group run by Shri T.V. Mehta Charitable Trust was recently awarded with the prestigious 'Shiksha Bharti' award.

This 'Shiksha Bharti award' has been given for Gardi Vidyapith's high credentials and its contribution for providing novelty in education sector and giving students a new height in learning.

The World renowned All India Achievers Foundation has selected Gujarat's reputed Genius group of institution which includes the Genius School, Jay International School and Gardi Vidyapith for this prestigious award.

This award was given at a grand function held at Delhi on September 10. A seminar on 'National Economic Development and Social Responsibilities' was also organized along with the award ceremony. In this seminar well-known economists and sociologist from entire globe delivered their lectures.

For this outstanding achievement of Gardi Vidyapith, all well-wishers, friends, parents, students and staff members have expressed their happiness.

Congratulations messages are pouring on the Genius Group Chairman D.V.Mehta, CEO Prashant Mehta, Academic Director Prof. S.B.Jadeja and Dimple Mehta for receiving this prestigious award.

Genius group has thanked the entire society for their wishes and support on the achievement of this honour.

Freedom Fiesta

India is the cradle of the human race, the birthplace of human speech, the mother of history, the grandmother of legend, and the great grand mother of tradition. Our most valuable and most astrictive materials in the history of man are treasured up in India only! - Mark Twain.

On its 66th year of Independence Gardi Vidyapith like the rest of the nation wore patriotism and pride on their sleeves.

The day was marked with a grand celebration and tribute was paid to those for whom we live to see free India. As tradition pleads flag was hoisted by Chairman D. V. Mehta followed by a speech that will be remembered to all in the days to come.

"Intellectual war is the idea whose time

15th August and it's colours

Celebrations @ Gardi Vidyapith

has come; the only way to set yourself apart from other nations is your knowledge and not your muscle. You, as student should wake up every day with a goal to be productive and to contribute towards your nation's development. You should take it upon yourself, no matter what your field of study is, to achieve par excellence that will make your nation proud. And also one should know and learn that to grow is to belong to a team, no human has ever achieved anything all by himself, so team work and only team work will help you realize your dreams. As a student you should inculcate the ability to be accepting and tolerant of people and also to learn the joy of working together. Only then will our nation progress and receive its due".

After the flag hoisting ceremony cultural program was performed by students and faculties of department.

Pritha Dutta
Faculty, Department of Journalism

Topic of The Month

Internet-based social networking sites have created a revolution in social connectivity. However, con artists, criminals, and other dishonest actors are exploiting this capability for nefarious purposes.

There are primarily two tactics used to exploit online social networks. In practice, they are often combined.

1. Computer savvy hackers who

Quote of the Month

"Believe, when you are most unhappy, that there is something for you to do in the world. So long as you can sweeten another's pain, life is not in vain."

Can social networking sites become a weapon for mass destruction?

specialize in writing and manipulating computer code to gain access or install unwanted software on any computer or phone.

2. Social or human hackers who specialize in exploiting personal connections through social networks. Social hackers sometimes referred to as "social engineers," manipulate people through social interactions (in person, over the phone, or in writing).

Campus Drive

The audience at Gardi Vidyapeeth Campus was fortunate to listen Swami Paramatmanandji's sparkling speech on Re-Engineering Ourselves - Religious Innovation which was organized by B H Gardi College of Engg & Tech on 22 August.

It was an attempt to create awareness among students about their own existence and importance. The speech was initiated with Swami Paramatmanandji's question on "The significance of Life."

According to him the chief objective of life is to live with full patience and enthusiasm and with honor. In today's modern life, human beings are losing interest in their lives and are becoming more and more disinterested towards everything. Swamiji said, there is a great need of re-engineering of ourselves with pure

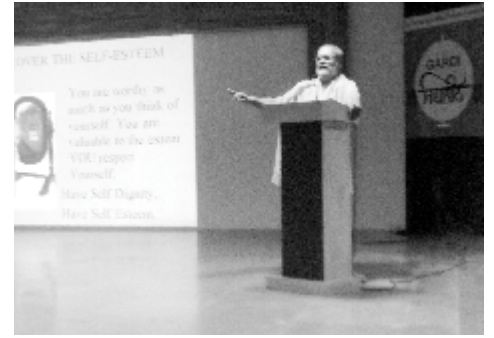

Spiritual Talk "Re-Engineering Ourselves"

by Swami Paramatmanandji

thoughts, passion, inner-vision, and sense of excellence. One should know this fact that each human is a unique creation of God.

Swamiji opined that "We are spiritual beings, temporarily housed in a biological body, a body that God has seen fit to give us until the time comes for us to journey to our spiritual home. Each of us has a purpose or a mission to perform our duty in our lives. Living life is just to create a right direction of flow with the potential insight of the person. We should believe in ourselves that we are creators of our own destiny."

According to him, Love is the major source of all activity. Love drives creativity and creativity drives towards excellence. Love for work, love for society, love for all creatures and most important love for oneself can generate a great light of

knowledge for performing duties. Love is nothing but awareness towards one's duties and responsibility.

Emphasizing on what has already taken place, he said "Past that it is a place to visit but not to stay. Past is the gift of God which human beings possess only. The sense of past is a device for learning and making oneself strong to face any challenges in future. The entire speech was very fruitful and enlightening for all the listeners present at the location.

Expert Seminar

"Industries' Expectations from Engineers"

To make students familiar with various companies in EC field, the BHGCET department had recently arranged and organized expert seminar on "Industries' expectations from engineers" on July 28th, under the series 'Know Your Industry'.

Mr. Jijesh Kurup of REXROTH BOSCH, AHMEDABAD began the seminar by introducing the 125 yr old German giant BOSCH to the students.

Some amazing facts about the company highlighted by Mr. Kuruo stunned the audience. According to him,

BOSCH has over 600 billion turnover out of which it invests large amount of sum in research and development. It was interesting to know that, no automobile in main parts of the world can be made without using any component from BOSCH. Every working day around 15 patents are registered by the R & D division, which sums upto around 1 patent every 30 min !!

Mr. Jijesh Kurup who is an H. R. manger also shared his views regarding the current scenario of industries and crisis faced by them. He highlighted that, India has second largest number of engineers but lacks real talent. According to him, degree does not assure a job unless one is really qualified for the job.

He also gave a presentation on what industry expects from an engineer. He made students understand the value of right education, skill development, discipline, team work, positive attitude and many other such helpful points. He shared his views on how to give an interview in any firm.

Students from Mechanical and Electrical branch were also present to attend the seminar.

Social Activity by ME : Sports Kit Distribution

The 5th and 7th semester students of Mechanical department recently visited the home for Mentally Retarded children, situated near Crystal Mall Rajkot.

As a part of the social activity program, conducted by the department every year, the sports equipments including Bat-Ball, TT,

Basket ball Rackets were distributed at the home.

The students spend few hours with these children, played games and also distributed snacks and tea.

As a part of social activity program, annually, fund is raised from the departments for such noble cause.

Campus Drive

As a part of its ongoing social activity a medical camp was recently organized by CSE/IT department at Khirasara Government School, Rajkot. After seeking the permission of Mr. Vinubhai Dhingani, Head of school, general check up was conducted and necessary medicine were prescribed by Dr. Vipul Vishnuswamy, general physician, Nikawa and Dr. Vinod Sakariya, child specialist.

Dr. Vinod Sakariya checked the children

Social Activity by CSE/IT : Medical Camp

who were 1 - 6 years old in presence of their parents and Dr. Vipul Vihnuswami checked 7-15 years old children. Some medicines which were given and other medicines were prescribed if the child suffered from any severe disease. Among 92 children, 28 children were prescribed other medicines. The entire medical checkup was done under the supervision of C.R.C. Team and their staff and Mr. Vinubhai Dhingani. The college provided a packet of biscuits to each child and

donated two first aid kits to school. The children enjoyed the entire session playing different games with the team.

Industrial visit @ Hydro Power Plant at sardar Sarovar

An industrial visit was organized for the 5th semester Mechanical Engineering students at the hydro power plant at the Sardar Sarovar Dam recently.

The dam having height of 126 m(455 ft) and length of 1210 m(3970 ft) impounds the flow of Narmada River. The capacity of reservoir is $95 \times 10^8 \text{ m}^3$. The students visited to the main section of the of the

plant where the actual electricity is generated using turbine. There are total 6 turbine, in which all the 6 turbine works, but 3 of them were main turbine which worked continuously and other 3 worked when there in decrease in height of water somehow and are reverse turbine rotate in reverse direction. The capacity of each turbine to generate electricity is of 200MW.

Students visited many units including control room and rope way sight, which provided them practical and first hand information and knowledge.

"One Month Automation Training based on PLC & HMI"

Under the Students Skill Enhancement Activity the Electronics and Communication department recently organized one month Industrial training for the students in the field of automation. The aim of the automation training was to make the EC students employable.

The training started with basic understanding of the architecture of the PLC and different types of the inputs as well as outputs such as the sinking and the sourcing types.

The students were exposed to the basic instructions which are being used in the programming of the PLC. In the same week, the students started building the applications on the OMRON PLC using CX-PROGRAMMER software, which gave the true industrial scenario by making the

programs for, Biscuit packing plant, Bottle filling plant, Apple counting and packaging plant, Priority definers, and Drilling machine mechanism.

Students did all the connections of the PLC on their own and downloaded the programs in the PLC and connected sensors to see the real functioning of PLC.

After the OMRON, came the PLC which is considered as the market leader now i.e. ALLAN BRADLEY and to get familiarity with the software of ALLAN BRADLEY (RX LINX LOGIX & RX MICRO ENGLISH). The students tried to do the same programs in this software and the other programs which were selected by themselves on the basis of knowledge they got in the previous week.

A detailed session on HMI (human to machine interfacing) and made the HMI

for their all the applications with the different designs and logics using PM-DESIGNER software.

Students did the Ethernet connection of the PLC's to know how to operate it from the remote places, also with the help of RS232, RS485 and USB protocols.

The department thanked Jaydev sir, Parasbhai for taking pains to make their training program a grand success.

Campus Drive

The students of CSE/IT department recently visited Infosys - Pune, as a part of their industrial visit program. The visit started with the campus tour continued with the spark event were in many Infosys experts took very interactive lectures.

A group discussion on topic "How to build up an NGO" was conducted. The students had a great experience working

Industrial Tour Infosys Pune

in teams with students of the other colleges having different dialects and way of thoughts. Thoughts regarding group discussion topic were presented in front of participants, faculties and Infosys coordinators, by the students.

The Infosys tour provided exiting exposure to the students who also got a chance to visit various sections of the campus.

Student Organized Activity (SOA)

Competition : "Word Power Raiser"

Organized By : 5th EC Students, BHGCET

The Electronics & Communication Engineering Department of the college has launched one series titled "SOA-Student Organized Activity" as a part of co-curricular activities. In SOA, students organize wide range of activities for their class with motto of "Learn with Fun". SOA is aimed to develop & improve various skills like presentation/communication/listening skill, leadership, teamwork among the students. It also helps combating shyness & stage-fear.

Recently, a competition "Word Power Raiser" was organized for the 5th semester students. The 1st SOA session

was based on assessing word power of the students. The event had four rounds in it. The 1st round was targeted for whole class. The round (20-20) consisted of written test of 40 MCQs, 20 synonyms and 20 antonyms. Out of all the 70 students present, 15 were selected.

The 2nd round comprised of comprehension test. Students were divided in five groups. They were given 20 minutes to read the passage and answer the questions. After the test ended there was tie between group A & C. But no team was discouraged and permitted to play third round. The 3rd round was a buzzer round.

It was a test for fill ups to check the grammar and tenses of the students.

"Programming in C"

To make clear fundamentals of 'C' language and to get proficiency in it, SOA has designed activity in which troubleshooting by performing simple to hard practical which runs every week. From July 2nd onward every Thursday by the EC students.

Seminar on Projects in Computer Engineering

A seminar on Project in Computer Engineering was recently organized by CSE department. Mr. Deepak Patel, CEO Charlie Computer, Ahmedabad conducted the seminar. Mr. Deepak informed, how a development of Computer IT project different than other engineering stream.

He discussed how to analysis a project before going to to implement. He also discussed on requirement gathering for developing a project. Further he discussed about how to select a platform for developing project, various database management system and its advantages and disadvantages.

Quiz Competition, Group Discussion

The Department of Mechanical Engineering recently arranged departmental activities for the students of the first year. First part of the activity included Quiz Competition which was held at Convention Center, Gardi Vidyapith.

This was first experience of students to be part at college level activities. There were

total number of 33 participant and 11 groups formed for Quiz Competition. Out of 11 groups based on score top 5 groups were selected for final round. It includes rapid fire, buzzer round; identify the personality from picture and voice.

It was very tough competition between top 5 groups and at the end Mr. Dhakhada Virendra, Mr. Gondaliya Kaushik and

Mr. Manu Piplotar was declared as winner team.

Department also arranged Group discussion for the 5th sem students. The aim of group discussion was to help students overcome stage fear as well as help them to develop themselves in terms of communication skills and personality. That will help them at the time of job placements.

Placement Corner

The EC engineering Department recently organized campus drive of AB Industries, Baroda for selected final year EC Students and selected Computer Science & Engineering Students.

Mr. Chetan Dadhania, Who work as Head (R & D) 'AB Industries', situated at Baroda, represented the company. The company is in to medical equipment designing and

Campus : AB Industries, Baroda

manufacturing. Its main product is ventilators which is a critical care equipment & requires high degree of precision & Accuracy. Company is also into Industry Automation.

15 students having expertise in the area where company is working were identified from the entire final year batch. From CSE dept. 10 such students were identified. Mr. Dadhania interviewed all the

candidates separately. He asked questions related to the project done by the students till their 6th Semester. The Company has finalized 2 candidates for the Industry defined project and subsequent training in Semester 8. If their performance is satisfactory, they will be offered job. Students have been given project based on Embedded System. The candidates selected includes Chirag Jethva and Nirav Bhatt.

'6 Ps To Crack an Interview'

It is extremely essential to go well prepared for an interview. Keep in mind six easy pointers or '6 Ps' for a successful interview.

- **Punctuality**
- **Presentation**
- **Preface**
- **Preparation**
- **Proficiency**
- **Phraseology**

Punctuality is the first perception the interviewer gets about the candidate.

- Come to the venue fifteen minutes before the scheduled time.
- Take some time off to go through your resume once again and also the company profile.

Presentation of oneself is of prime importance though many may not be aware.

- As you may not be aware of the company's dress code, wear smart formals in which you are comfortable.
- Do not use too strong a deodorant or perfume.
- Be well groomed. Look at yourself from head to toe and step out only if you feel totally satisfied.
- Stand straight, relaxed and with a slight smile.

Preface is crucial. So do be cordial while introducing yourself.

- Firstly, introduce yourself with your name and make sure your eyes meet that of the interviewer. This reflects your confidence.
- Shake a hand with the interviewer and be sure to be firm while doing so.

Preparation by equipping yourself with

relevant information about the company.

- Be specific, interviewers are generally looking out for statistics and revenue numbers.
- Make sure you are also well aware of your current company's specifics as well.
- Having competitor information is a definite plus point and shows that your knowledge of the industry as a whole is well aligned.
- Don't sound brash while showcasing your knowledge.

Proficiency at an interview is derived from practice or rehearsals before the interview.

- Try mock interviews with a friend or you could also use the mirror as a substitute.
- These rehearsals help instill a good amount of confidence and dramatically reduce the chances of you being nervous.
- Always know your strengths and weaknesses and be sure to back it up with adequate instances.
- Never bring out a situation where you have failed. Always speak of challenges for which creative solutions were found.
- Be aware that your interviewer will be very interested to know about how well your action/reactions would have induced a situation or the outcome itself.
- Do not make up scenarios; you could

be against a wall with a small slip.

Phraseology of the body or more commonly 'body language' plays an important role while facing interviews as much as verbal communication if not more. One's body language must communicate attentiveness, enthusiasm and confidence.

- Make eye contact and periodically break away. Do not look at the floor.
- While sitting in your chair sit straight, leaning might convey lethargy. An upright posture exudes confidence.
- Always be positive about the way you deliver and the content of your conversation.
- Avoid using movements that takes the interviewer's attention away from your face.
- Do not move your hands wildly or keep them behind your head or reclining on your chair.

Note: The above mentioned 'Ps' are just a few pointers on how one could make better the interview experience and make a positive impression upon the interviewer.

Prof. S. B. Bhatt

Training & Placement Cell

Aviation Students @ AIR INDIA

Students of Customer Service and Ground Operation Management , Aviation Department got an opportunity to work as an interns with Air India to familiarize of in-flight and airport

ground handling services, for which the students will receive a certificate from Air India. It will extremely beneficial in giving in-depth knowledge of aviation, hospitality and travel industries.

Students who got this opportunity are Vegad Raghuraj, Akhediya Darshit, Hariyani Vivek and Rathod Sonal.

Thought World

GOD and Existence of GOD

What is GOD?

- G - Generator** : He is the doctrine behind creation (**Brahma**)
- O - Operator** : The god one who looks after the universe (**Vishnu**)
- D - Destroyer** : He is the doctrine behind obliteration. (**Maheshwara**)

Why do people have different thoughts about GOD? Because they have different experience about GOD. Each and every person in this world has one or many experience about God, in one or different way. Some can feel the miracle some cannot. It depends on their mentality. It also depends on "whether you want to feel that miracle or not". Yes if one thinks that there is no God exist then for him everything that happens is all the Law of nature. But if one thinks that god do exist then for him the god is the only supreme. From such discussion we have different types of people existing in this world. Let's see how many types:-

Theism :

Theism is the principle in the existence of a God. The meaning of this word is "one who believe in the existence of a god or gods"

It says that God exist practically, independently (without prejudice). God is supreme and everlasting. It holds that God is both magnificent and immanent; thus, God is concurrently infinite and in some way present in the affairs of the world. Most theists hold that God is omnipotent, omniscient, and benevolent. But what about the responsibility of GOD

when there appears the evil disasters? Why does God not appear when this world is suffering? In the answer of those questions some theists answer that god has his own limitation to his supremacy.

Atheism :

Atheism is opposite of theism. It means not to believe in god. Atheism believes that there does not exist any of the thing that can create a miracle. It only believes that power that exist in this world is materialistic or the power of the human being. Means anything that happens in this word is only because of scientific reasons. In other words, atheists says that atheism exist because of the lack of evidence and the problem of evil.

Deism :

Deism = theism - miracles.

Deism is one type of theism but there does not exist any type of miracle. Deists believe that God do exists but any of the miracles that happen around the world are all the law of nature which is not created by god but it happens by its own or by any of the scientific reasons. They believe that god created this world. But he do not interfere events happening. Means he does not interrupt after his creation.

In other words god is the creator of the world but not the operator. Each creation is independent to live after its creation.

Pantheism :

Pantheisms are of different types :

Absolute pantheism : This type of pantheism teaches that there is only one being in the world, God. All else that appears to exist does not actually exist.

Emanational pantheism : It says that everything flows from God, just as a flower unfolds from a seed.

Modal pantheism : It says that there is only one absolute Substance in which all finite things are merely modes or moments.

Multilevel pantheism : It says that there are different - levels or manifestations of God, the top most level manifesting God as the supreme One and the bottom levels successively manifesting God in greater multiplicity.

Amit G. Maru (CSE/IT Department)

Thought World

Is Our Freedom Really Worth?

Happy 66th independence day. We are grateful to our leaders and freedom fighters who fought for our freedom, and gifted us the free air in which we are living, but after celebrating this Independence Day a question raised in the mind of a common Indian citizen "Are we really free?? Is our freedom really worth?" The foundation of English empire laid in our country in 1600 with establishment of East India Company. After 1857's revolt people of India realised that strive for freedom is necessary and after a long bloody fight we gained our freedom, but the real story starts here.

Today, India is considered as one of the most corrupted nations. Before independence, Indian civil forces and politics were clean and uncorrupted. On

the humane grounds, it is seen clearly India is still backward and we are aware that many evil practices like satee were completely banned; thugs and dacoits were greatly suppressed. Coming to law and politics, we are still using the judicial systems that are formed in the British rule and we all know about its present condition, the electoral commission was formed by British govt. Technologically, Indian Railways which is considered as heart of the nation was developed by British govt.

No doubt that freedom is the basic requirement of any person or a nation but the question is why we are unsuccessful in developing our own nation? Why after having such a vast natural and human resources we are legging in establishing a

good democracy? The simple reason for that is we are concerned with own progress rather nation's progress. We don't pay taxes, follow rules or participate in nation's progress. All we do is compare our nation with other developed nations, abuse the systems and continue our deeds.

If the patriots who fought for our country were able to see today's condition they would surely groaned in pain because enemy's bullet hadn't harmed them enough. Our free air is highly polluted and hence the pain of the common man is not seen, his questions are not answered. But one question will remain "Is our freedom really worth?" And if no, then let's make it worth...

Kapadia Rushit (10CE25 (5th CSE))

Expert Talk

M H. Gardi School of Management & C. C. Gardi Institute of Management invited Prof. Khandelwal (A motivational speaker) to deliver the Expert talk on the topic "Hanuman as a manager" on 18th August, 2012. In his session, nearly 100 students & faculty members had taken part.

Prof. Khandelwal started the session with the current economic revolution in USA. He explained the concept of management by highlighting the economic crisis in European countries where they were under heap of debt due to lack of management. Further he said that the Indian Epic Bhagwat Geeta is taught as a subject in Harvard University. Through this he came to ancient India

Expert Session on Hanuman as a Manager

where Lord Rama and Hanuman lived who in today's world can be called as an 'ethical hero' and an 'ethically devoted executive' respectively. He said that Hanuman possessed all qualities which a manager should have like dedication, devotion, self confidence and leadership. For Hanuman nothing was impossible which he proved by bringing Sanjivani Buti.

Further, he added in his talk that as Hanuman was cursed that he could know about his abilities only if someone realizes him about it, same way in management every person must be made aware about his abilities and qualities. He ended up the session saying Hanuman considered every work to be an important one and answering the questions of students like how to become a successful manager, difference between a leader and manger and qualities of a manager.

The Chairman of Gardi Vidyapith, Shri D.V. Mehta sir has mentioned at the end of session that everyone has to expand his or her boundaries to grow into this competitive market.

Knowledge Enhancement

Under the faculty development program a seminar was organized by Computer Science and Engineering Department of B H Gardi College of Engineering and technology is to address positive attitude and student motivation as a part of a faculty development program. The seminar was planned and schedule to address various aspect of Effective Communication Technique for faculties.

Mr. K.S. Yadav, regional director of central board for workers education and Mr. Pathak, education officer were the speaks of the seminar.

Mr. Yadav delivered lecture on Personality and attitude which is a never ending process in life. Mr. Yadav, who has 25 years of experience in human behavioral

Faculty Development Program

science, has delivered seminar sessions in different parts of India. The topic he mainly covers was addressing positive attitude and effective communication technique.

He explained the **"Power of Thoughts"** with the vision of Buddha.

"Suffering follows the person who speaks and acts with impure mind. But if a person speaks and acts with good mind, happiness follows like a shadow."

He explained how Reading habit can bring pleasure that consoles and heals our life. Along with that there are number of points that he discussed included,

- Importance of positive attitude for Education
- Effective way to motivate students

- Explore new areas
- Learn from other
- Set goals
- Do the right thing
- Take inventory of your skills
- Be more creative
- Switch to positive
- How to make Lecture more effective

Cont... from page 1 **Can social networking...**

Human being are a weak link in cyber security, and hackers and social manipulators know this. They try to trick people into getting past security walls. They design their actions to appear harmless and legitimate.

Once information is posted to a social networking site, it is no longer private. The more information you post, the more vulnerable you may become. Even when

using high security settings, friends or websites may inadvertently leak your information.

Personal information you share could be used to conduct attacks against you or your associates. The more information shared, the more likely someone could impersonate you and trick one of your friends into sharing personal information, downloading malware, or providing access to restricted sites.

Predators, hackers, business competitors, and foreign state actors troll social networking sites looking for information or people to target for exploitation.

Information gleaned from social networking sites may be used to design a specific attack that does not come by way of the social networking site.

Arty Party

Ohh... God knows, who was that girl?
Whom I met on last summer
When I came up to stay with my grand
Her hair was longer with brown skin
And the way the sunlight plays upon her hair
I love the colorful cloth she wears
And her brownie eyes
This makes her different from others,
I hear the gentle sound
On the wind that lifts her perfume through air
Her smile brings joy and brightens my day

Who was that girl?

Also brings a way to have lucky day
I remembered her eyes which constantly stare
Ohh... God knows, who was that girl?
I remembered her innocence
When, she was playing with a tinny butterfly
She was a girl, who remains anonymous
She was a girl, who indeed magnanimous
Ohh... God knows, who was that girl?
Ohh... God knows, who was that girl?

Photo Story

F & T @ Award Ceremony

Gardi Vidyapith, Film n Television Dept. and Journalism Dept. was bestowed with a memorable experience, a day of limelight and galore. Yes! It was the day when the students of the department were a part of Gujarati film Cine Aishwary Award which was held in Ahmedabad. This opportunity wouldn't have been possible without Professor Ashok Patel of the Film n Television Department. He is a renowned name with distinct achievement. He has remained a script writer, director and producer of many Gujarati films. He also happened to be the honorable jury member of the award ceremony.
