

## Expert session on NX Software and Higher Studies

Mr. Akash & Mr Partik delivering Expert session

Mr Avinash Delivering Expert session

Students getting brief idea for Software

**Objective: To aware about NX software and for higher study in aboard.**

**Introduction:**

The experts have discussed how the design is affect the performance of the object. Students were given insights about what an engineer or designer has to think when a new product is being developed. Speaker further moved on to the scenario of Good Looking of the NX Software. To enhance their methodology regarding software knowledge this expert session was organized on 11/07/2018at Mechanical Engineering department. This session was delivered by Mr. Akash and Mr. Partik (Working as a design Engineer in well know Industry at Rajkot).

After the Completion of software talk Mr Avinash Fulbaria has given the basic information regarding the higher study in aboard for the betterment of the knowledge how to prepare for the higher study, regarding the different language which was necessary for the different countries etc.

**Outcome:** The process of design and development start from scratch to final product release. To learn various design and development strategies by using various software tools. To get idea of higher study in aboard and their benefits.

**Feedbacks:**

-Kaushal Kalotara:

“It was simple and good”.

-Bhavik Divecha:

“We got ideas about abroad studies”.
